

BEGINNING iOS UNIT & UI TESTING

PART 7: TDD EXAMPLE

TDD CYCLE

Red-Green-Refactor Cycle

TDD CYCLE

1. Add a new test.
2. Verify the test fails. 
3. Add minimum code to pass test.
4. Verify the test passes. 
5. Refactor tests & production code.
6. Verify all tests still pass. 
7. Repeat!

TDD BEST PRACTICES

- ▶ Start with a simple, small test
 - ▶ Doesn't matter where you start, but should be simple
- ▶ Try to write tests before production code
 - ▶ At very least, make sure all tests can fail
- ▶ Refactor "from green to green"
 - ▶ Comment production code temporarily as needed

DEMO

- ▶ Start the “Bowling Game Kata”
- ▶ Used with permission from Jon Reid,
qualitycoding.org

CHALLENGE

- ▶ Complete the “Bowling Game Kata”
- ▶ Used with permission from Jon Reid,
qualitycoding.org
